PLAZA

People St

## Kit of Parts for Plazas

2018

**LADOT**

Dear Angelenos,

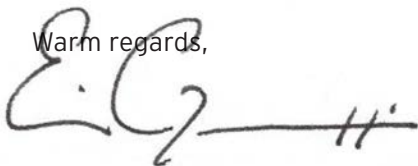

I am pleased to invite you to present your ideas to be a part of **People St**, a program that transforms neighborhoods across our city. People St was developed by the Los Angeles Department of Transportation (LADOT) in collaboration with the Los Angeles Departments of Public Works and City Planning, and the Los Angeles County Metropolitan Transportation Authority (Metro), all of whom will work closely with community groups on this effort.

People St represents one of the many tools in our **Great Streets** toolbox. We are working to change the way Angelenos interact with the built environment, while using existing government resources to make City Hall work better for our residents and businesses. Fundamental to People St is its bottom-up, community-based approach. I am proud of our city's transportation and planning experts, but no one knows more about our neighborhoods than you.

It is fitting that such an innovative program will be taking root here in Los Angeles, where we are experiencing a fundamental shift in how we make our city streets safer and more enjoyable. I look forward to the many new Plazas, Parklets, and Bicycle Corrals that will be created by People St and am excited to continue working with all of our departments to spearhead other creative initiatives.

Please join me and all of us at the City of Los Angeles in fostering Great Streets in our neighborhoods and communities. We look forward to seeing you on the street.

Warm regards,

Mayor Eric Garcetti

City of Los Angeles Department of Transportation  
Vision Zero Division  
100 S. Main St., 9th Floor  
Los Angeles, CA 90012  
[ladot.lacity.org](http://ladot.lacity.org)

The **People St Program** was created by the City of Los Angeles Department of Transportation (LADOT) in collaboration with the City of Los Angeles Departments of Public Works and City Planning, the Office of Mayor Eric Garcetti, and the Los Angeles County Metropolitan Transportation Authority (Metro).

## 33 ROADBED GRAPHICS

## 41 SIGNAGE

## Introduction

A **Plaza** creates a publicly accessible open space by closing a portion of street to vehicular traffic. A durable and decorative surface product is applied to the roadbed, while large planters and other elements define the **Plaza** perimeter. The Community Partner maintains and operates the **Plaza**, providing movable tables, chairs, umbrellas and other furnishings; public programs; and ongoing neighborhood outreach.

Providing expanded public spaces can increase safety for people who walk, bicycle, and take transit. It also encourages increased levels of walking and bicycling, while supporting economic vitality. New local gathering spaces can foster a greater sense of community and social cohesion. **Plazas** can also become centerpieces of neighborhoods, providing venues for events and celebrations. As more people come to spend time in neighborhoods, the increased activity may support the vibrancy of local businesses.

# Plaza Typologies

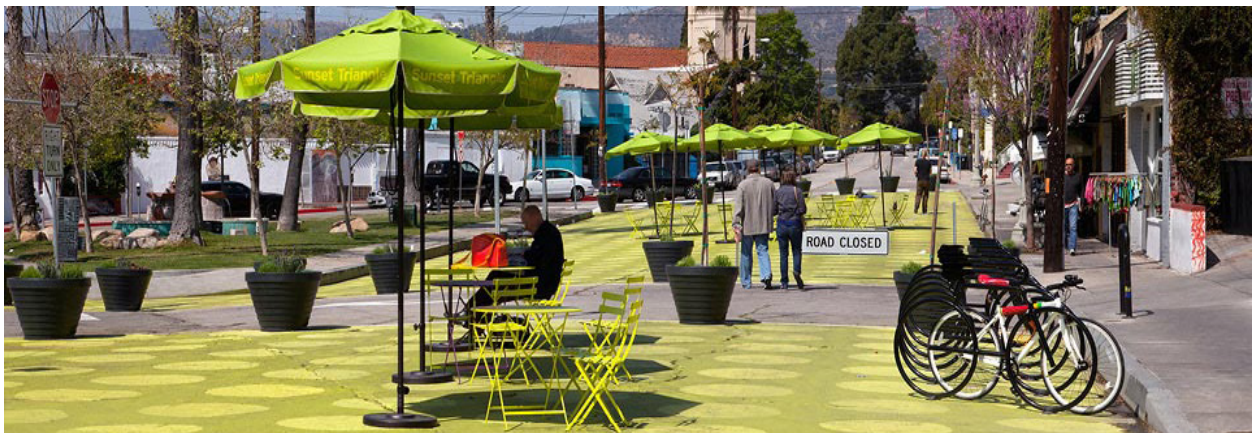

Plazas can occupy a variety of site conditions. They may repurpose underused right-turn connections or closed street ends. Community Partners should work with LADOT to determine an appropriate site and configuration for their Plaza.

## Plaza Design and Programming

The design and configuration of each People St Plaza will vary depending on the particular site constraints, in addition to programming needs of the sponsoring community group.

Despite the necessary differences in the size, shape, and use, the design of each Plaza will employ a similar set of design components—materials, furnishings, and safety elements—to create visual and aesthetic consistency throughout the program.

The design components are intended to help support programming opportunities at each Plaza site. Events and activities, both informal and organized, will create a vibrant atmosphere and help transform the Plaza into a neighborhood destination. Events and activities may include temporary public art installations or exhibits, music, dancing, yoga classes, art classes for kids, hula-hoop contests, or other community-oriented programs.

Sunset Triangle Plaza in Silver Lake

Leimert Village Plaza in Leimert Park

**Components**

## Plaza Components

LADOT will be responsible for providing and installing a standard set of features for each Plaza. These features include roadbed surface treatment, perimeter planters, flexible delineators, identity signage, and bicycle parking. Other Plaza components and furnishings are purchased, installed, and maintained by the Community Partner.

### SURFACE TREATMENT

Roadbed surface treatment will demarcate the space of the Plaza using a durable pigmented polymer cement product (described in the **Roadbed Graphics** section of this manual).

### PERIMETER PLANTERS

Perimeter planters are intended as a protective barrier to prevent vehicular intrusions into the Plazas. All perimeter planters will be light in color and weigh at least 700 pounds when filled.

### FLEXIBLE BOLLARDS

Flexible bollards are flexible, surface-mounted reflective posts that are used to define the space of the Plaza. The bollards enhance the safety of the Plaza by offering motorists a visual indication of the edges of the Plazas.

### IDENTITY SIGNAGE

Free-standing human-scale identity signage will feature the official Plaza name, Plaza rules and a wayfinding map.

### BICYCLE PARKING

Bicycle parking can be incorporated into a Parklet in a variety of ways.

- Where feasible, meter heads may be replaced with meter hitches.
- For locations with concrete roadbeds, standard inverted-U bicycle racks may be installed on the roadbed adjacent to the Parklet.
- Bicycle racks may also be installed on adjacent sidewalks through the LADOT Sidewalk Bicycle Parking Program.

**Furnishings**

## Plaza Furnishings

This section includes information about off-the-shelf components and furnishings that have been pre-approved by People St and may be purchased by the Community Partner to furnish a **Plaza**. Furnishings offered at a Plaza will greatly impact how the space is used. Community Partners should select furnishings that support the desired programs for the Plaza, both informal and formal.

**Options for furnishings are organized by thematic uses:** café, active, and lounge. Furnishings can be combined to provide multiple uses for a Plaza. All elements and site furnishings in the Plazas should be wheelchair accessible per ADA guidelines.

Cafe seating in NoHo Plaza

### CAFÉ

Café furnishings encourage informal gatherings, providing spots for lunch, coffee with a friend, or working outside on a sunny day. Café furnishings can be grouped together to create nodes of activity and umbrellas can be added to provide shade.

Exercise equipment at Bradley Avenue Plaza

### ACTIVE

Active furnishings are components that support specific programmatic uses of the Plaza. Elements such as exercise equipment, bicycle racks, and bicycle corrals promote healthy lifestyles, either directly or indirectly. Other active furnishings, such as game tables and foosball, encourage an active interaction between users.

Lounge furniture at Bradley Avenue Plaza

### LOUNGE

Lounge furnishings contribute to a relaxed atmosphere by providing places to read a good book, chat with a friend, or just soak in the sun. Lounge furnishings include chaise lounges, benches, and custom feature seating.

### Please Note

- Products included in this section are recommendations. Comparable products of equal quality, specifications, and construction may be submitted to LADOT for approval.
- Vendor and manufacturer contact information is provided for convenience, however, vendor information is subject to change.
- Unit pricing is based on current available prices and are subject to change. Pricing does not include shipping, hardware, or installation, unless otherwise mentioned.
- Approved color options are based on the People St branding package. Alternative color selections must be approved by LADOT.

## REQUIRED FURNISHINGS

The Community Partner is required to purchase and maintain flexible café furnishings, consisting of tables, chairs and umbrellas for their Plaza.

- Moveable Umbrellas
- Café Tables and Chairs **(4 options)**

Café chairs, tables and moveable umbrellas at Sunset Triangle Plaza in Silver Lake

## OPTIONAL FURNISHINGS

The Community Partner may select from a variety of optional furnishings including lounge seating, fixed benches, communal tables, planters, exercise equipment and game tables.

- Lounge Chairs **(3 options)**
- Fixed Benches
- Communal/Picnic Tables
- Interior Planters **(4 options)**
- Exercise Equipment **(2 options)**
- Game Tables & Boards **(4 options)**

Roll-up game boards may be used on any table and stored by local businesses

**Roadbed Graphics**

# Roadbed Graphics

LADOT wil coordinate and install the required surface treatment for each project.

Roadbed graphics mark the area of the Plaza space. This serves to alert motorists to the Plaza perimeter as well as to brand the Plaza with a playful graphic presence.

# Roadbed Graphics Material

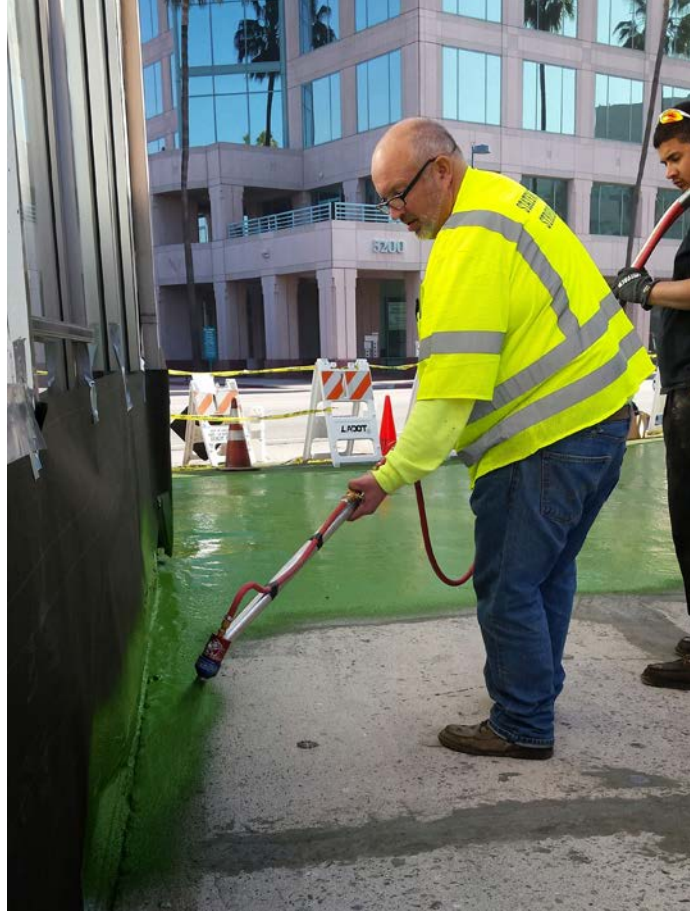

LADOT selected a durable and weather-resistant pigmented polymer cement product, mixed on-site and sprayed directly onto the roadbed surface by certified installers.

Painted roadbed at NoHo Plaza

## PIGMENTED POLYMER CEMENT ROAD SURFACE COATING

Pigmented polymer cement road surface coating is the surface product-choice for People St roadbed graphics. Polymer cement is highly durable and thermally-compatible with asphalt and cement surfaces. It is applied like a commercial paintjob and can be maintained with power-washing without causing damage to the surface. Other applications for polymer cement include bridges, cycle paths, and airport aprons.

**Signage**

# Wayfinding Signage

LADOT will coordinate the fabrication and installation of required, standard signage for each project. Wayfinding signage includes the Plaza name and a pedestrian-oriented map of the surrounding neighborhood.
